

Sensor Networks Application Panel

Is there life outside the military?

Alejandro Buchmann
TU Darmstadt

Wild claims 1

- There is no high payoff application outside the military
- Divergence between claims and reality
 - Size: requirements always talk about millions of sensors, research focuses on tens
 - Interesting applications will require heterogeneous sensors → context matters

Wild claims 1

- There is no high payoff application outside the military
- Are there easy mappings from the olive-green to the civilian world?

Wild claims 1

- There is no high payoff application outside the military
- Are there easy mappings from the olive-green to the civilian world?

Yes, but ...

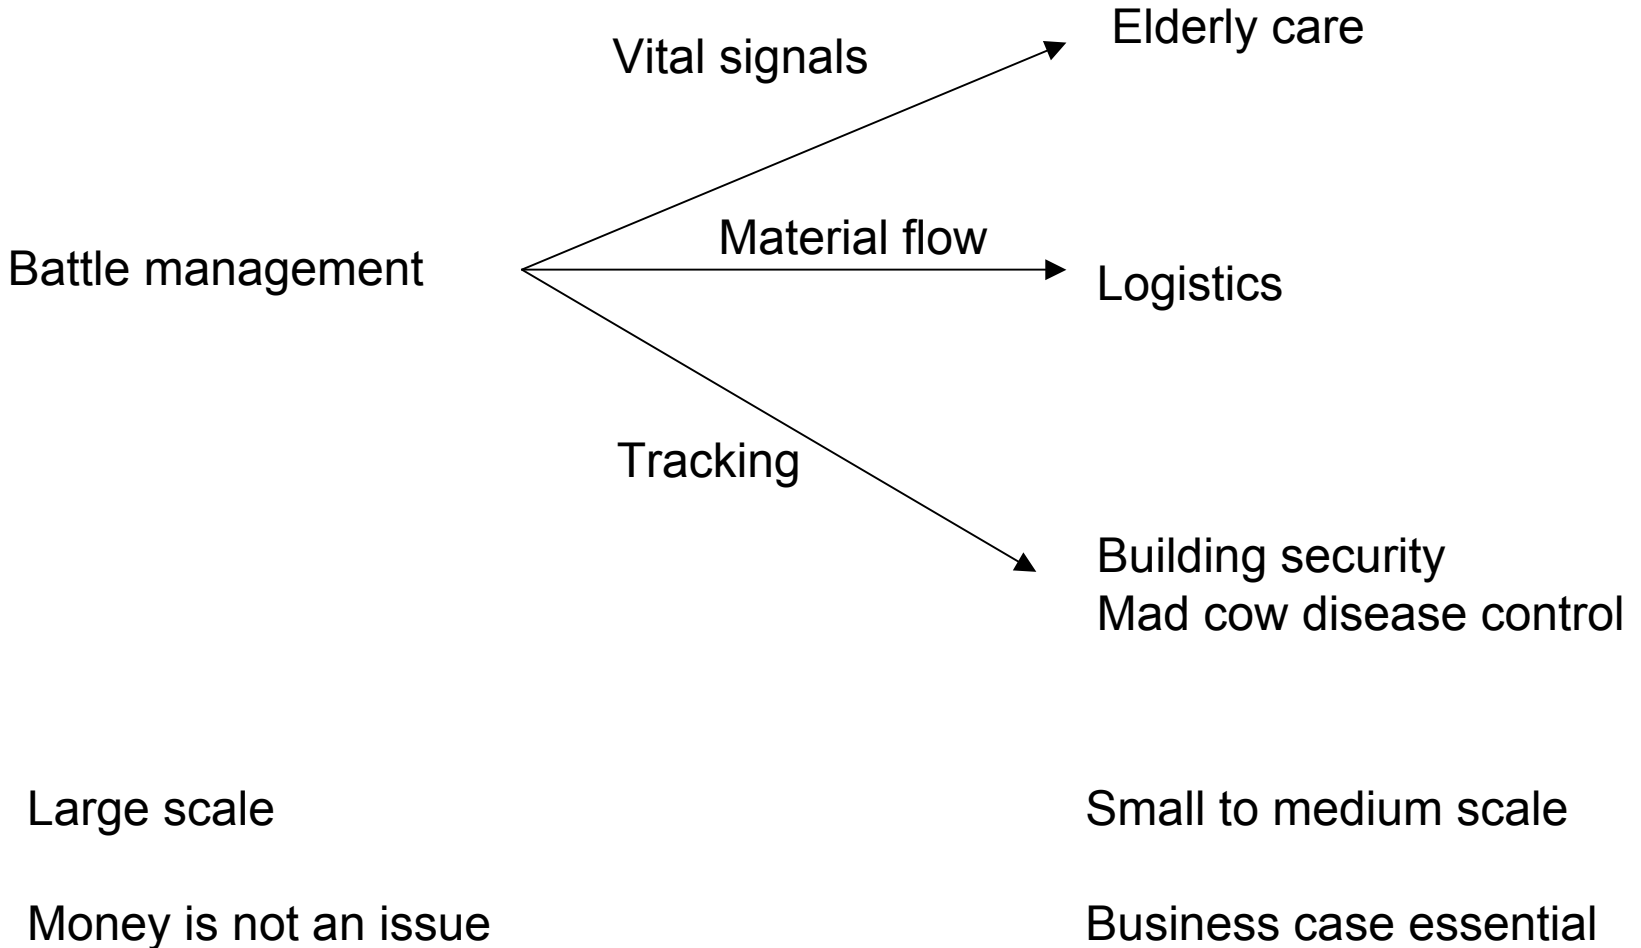

Wild claims 1

- There is no high payoff application outside the military
- Are there easy mappings from the olive-green to the civilian world?

Yes, but ...

Not in a SINGLE application!!!

Mappings

Wild Claims 2

- Divergence between claims and reality
 - Size: requirements always talk about millions of sensors, research focuses on tens
 - Interesting applications will require heterogeneous sensors → context matters
